MAINTENANCE APPRENTICESHIP PROGRAM (MAP)

A. PROGRAM

The Maintenance Apprenticeship Program (MAP) provides a means, when possible, for internal growth and advancement opportunities for University employees. The MAP also may be utilized to identify and select qualified external apprentice applicants, when qualified internal applicants are not available.

A committee, consisting of two (2) management and two (2) CWA representatives, will review, update, and modify the MAP guidelines prior to the implementation of the MAP.

The MAP Committee will establish the special requirements for the apprentice vacancy. The requirements may be revised or modified as deemed necessary by the MAP Committee. MAP positions will be posted in accordance with Article 11, B. (2), posting.
