Pickaway-Ross Career & Technology Center MSSC Fall Course, 2011

The Manufacturing Skill Standards Council (MSSC) is an industry-led standards-based, training, assessment and certification system focused on the core skills and knowledge needed by the nation's production workers. The nationwide MSSC System, based upon industry-defined and federally-endorsed national standards, offers both entry-level and incumbent workers the opportunity to demonstrate that they have acquired the skills increasingly needed in the high-growth, technology-intensive jobs of the 21st century.

After completion, students will be prepared to sit for the MSSC certification exams. The MSSC System awards certificates to individuals who pass any of its four Production modules: Safety; Quality Practices & Measurement; Manufacturing Processes & Production; and Maintenance Awareness and a full Certified Production Technician (CPT) Certification to those who pass all four. Applicable to all sectors of manufacturing, the MSSC goal is to assess 40% of the nation's entry-level and incumbent production workforce – a strategy for providing industry with a future pipeline of skilled workers.

Offered Online Starting October 15, 2011

Course Fee \$1875

120 hour program
