

ASSOCIATE TECHNICIAN at USEC

Individuals desiring a position as an ASSOCIATE TECHNICIAN at USEC Inc.'s American Centrifuge facility must first successfully complete or show proficiency in the American Centrifuge Skills Development Training Program. This program is offered through the Ohio South Consortium for Training and Education. The skills development-training program is a 240-hour program that leads to the National Manufacturing Certification and a fundamental knowledge of technology and physical science.

The first 120-hour Manufacturing Skills Standards Council (MSSC) class provides opportunities for workers and students to build core skills and knowledge needed for high performance manufacturing. The course examines fundamentals and interrelationships in areas of production manufacturing processes, maintenance awareness, quality, and safety.

Take the 120-hour Manufacturing Skills Standards Council (MSSC) training through
Buckeye Hills Career Center

The MSSC training will be conducted at the
Jackson County One-Stop
