

GlobalNet Training

CCNA e-Learning by Todd Lammle

Arm yourself with the knowledge to build LANS/WANS with this self-paced Cisco® Certified Network Administrator e-Learning track.

This program was designed for network programmers and developers who seriously want to increase their incomes in the computer networking field.

Objectives

This program will provide the student with the essential knowledge to install, configure, and operate simple routed LANs and WANs. In addition, the student will gain knowledge of switched LAN Emulation networks made up of Cisco® equipment. Our CCNA® program allows our students to maximize their training time and budgets. The program is a focused coverage of Cisco® router configuration procedures, which will be mapped to exam objectives and fully prepare you for Cisco® Exam 640-407. Extensive online lab time is allocated to provide feedback on troubles or solutions.

The program includes all materials: CCNA Sim 3.0 Standard Edition software, Autographed Deluxe SYBEX CCNA Study Guide by Todd Lammle (The #1 Selling CCNA Guide!), access to the most inclusive online CCNA Certification course available today, free test prep questions, instructor support, and much more.

A CCNA certified individual can do the following:

- Install and configure Cisco switches and routers in multi-protocol Internet-works using LAN and WAN interfaces.
- Provide Level 1 troubleshooting service.
- Improve network performance and security.
- Become marketable in the technology field as a help desk engineer, field technician, Level 1 systems engineer, Level 1 systems integrator and more.

For the first time ever, a complete online program is being offered with a full function, internetworking simulator. Students can now enjoy the flexibility to plan, test, design, and implement a complete network at their own pace!

TCP Mag Salary Survey 2001 - "Holders of Cisco's most popular certification title, the CCNA, reported a healthy base salary of \$69,900."

About the Author: Todd Lammle

Todd Lammle has written more than 40 SYBEX books and study guides that are used in GlobalNet's instructor-led classes. Mr. Lammle developed his knowledge through his 16 years of real-world experience designing and implementing LANs and WANs for Fortune 500 companies such as Sprint, Boeing, Texaco, IBM, Toshiba and Xerox.

How our online courses work:

- Begin when you wish.
- You are assigned an instructor for one-on-one assistance.
- Move at your own pace.
- Your work is evaluated and a 70% is required for a certificate.
- You should complete the course within 90 days but you may request an additional 90-day extension.
- You will receive a certificate from the school upon successful completion.

The courses are all self-paced. The instructors respond to the student, not the other way around. Each course has a set of lessons and exams.

Detailed outlines, demos and ratings are available at www.gatlineducation.com.
