

# Preferred Drug List

Drug list – Four (4) Tier Drug Plan

Anthem Blue Cross and Blue Shield prescription drug benefits include medications on the Anthem Preferred Drug List. You can save money when your doctor prescribes medications on the drug list. This list is not comprehensive. And your coverage has limitations and exclusions. For example, drugs used for cosmetic purposes usually are not covered. Always refer to your *Certificate of Coverage* for details about what's covered and what's not. Then if you have additional questions, call Customer Service at the number on your member ID card.

## Anthem Blue Cross and Blue Shield Drug List

Your prescription drug benefit includes coverage for medications that you'll find on the Anthem Preferred Drug List. You may save money by using lower tier drugs.

### Q. What is a Drug List?

A. The Anthem Preferred Drug List, also called a formulary, has drugs on it that are approved by the U.S. Food and Drug Administration (FDA). This includes brand-name and generic drugs, reviewed and recommended for their quality and for how well they work. The review is done by the National Pharmacy and Therapeutics (P&T) Process. The P&T process involves an independent group of practicing doctors and pharmacists in charge of the research and decisions surrounding our drug list. This group meets regularly to review new and existing drugs. They choose the top drugs for our list — based on their safety, how they work and their value. Drugs on our list are reviewed from time to time. Sometimes this results in drugs being added or removed. So now and then, it's a good idea to check the status of any drugs you may be taking. You can see the list by going to [anthem.com](http://anthem.com). Also, we will always try to notify you of any changes to the formulary that impact you.

### Q. How do we determine the tier of a drug?

A. Medications on the Anthem Preferred Drug List are grouped into tiers. Drugs on the lowest tier have the lowest cost share, which is what you pay. Drugs on the highest tier cost you more. Several factors determine what tier a drug is placed in, including:

- Cost of the drug
- Cost of the drug compared to other drugs used for the same treatment
- Availability of over-the-counter options

### Tier Definitions

**Tier 1 drugs have the lowest cost share.** These drugs offer the greatest value compared to others that treat the same conditions.

**Tier 2 drugs have a medium cost share.** They may be preferred drugs, based on their effectiveness and value. Some are newer, more expensive generic drugs. Tier 2 drugs have a higher cost share than Tier 1.

**Tier 3 drugs have a higher cost share.** They may cost more than others used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA. Tier 3 drugs have a higher cost share than Tier 2.

**Tier 4 specialty drugs have the highest cost share.** They may cost more than others used to treat the same condition. Tier 4 may also include drugs that were recently approved by the FDA. Specialty drugs are used to treat complex, chronic conditions and may need special handling.

### Q. What are “clinically equivalent” medications? How does this affect my drug coverage?

A. When drugs are compared in studies, some drugs have been found to be just as effective as others. These drugs are called “clinically equivalent” so it means they work just as well. Part of the P&T Process is to review the most current studies to see if multiple drugs used to treat a disease or a condition have the same effect on a patient. When this is the case, the Process review team may suggest that we cover only the lower cost drug (so we can help keep the overall cost of care as low as possible). This means your specific drug plan may not cover some drugs (indicated by a ^ symbol next to the drug name) that have clinically equivalent options.

### Q. Is this list a complete listing of all covered drugs under the Anthem Preferred Drug List?

A. No, this document lists the most commonly used drugs that are covered as part of the Anthem Preferred Drug List. If the drug you are looking for is not listed, you may call Customer Service for more information. The number is on your member ID card.

## For more information about your drug plan, you can do the following:

- Go to [anthem.com](http://anthem.com)
- Call Customer Service at the number on your ID card
- Speech and hearing impaired users (TDD/TTY) should call 1-800-221-6915, Monday – Friday, 8:30 a.m. – 5 p.m. ET

## KEY

This † symbol means:

A generic equivalent of this drug recently became available or will be available soon. After the generic drug becomes available and notification requirements are met, this brand-name drug will become Tier 3 or may no longer be covered by your prescription drug plan. Check [anthem.com](http://anthem.com) to find out about changes in tier status.

This ^ symbol means:

This product has clinically equivalent alternatives included on the drug list. As a result, this product may not be covered under your pharmacy benefit. For coverage details, consult your online pharmacy account through your health care plan website at [anthem.com](http://anthem.com).

This ~ symbol means:

You must try this drug first when treating some conditions.

PA = PRIOR AUTHORIZATION REQUIRED. Prior authorization means certain prescriptions have to be approved for coverage first, before they can be filled.

QL = QUANTITY LIMITS. Certain prescription drugs have quantity limits, meaning you can get only a specific amount of the drug at a time, per prescription or per month. This is usually for safety reasons.

ST = STEP THERAPY REQUIRED. You will need to use one medication first, before the use of another medication can be authorized.

ST $\infty$  = STEP THERAPY MAY BE REQUIRED. You may need to use one medication first, before the use of another medication can be authorized.

DO = DOSE OPTIMIZATION REQUIRED. This typically involves converting from a twice-daily dosing to a once-a-day dosing schedule.

Not all medications and not all plans are subject to prior authorization and quantity limits. For more information regarding prior authorization or quantity limits, contact Customer Service at the telephone number listed on your identification card.

**For Kentucky Residents Only:** In selecting medications for the prescription drug formulary, the therapeutic efficacy and cost effectiveness are addressed for each category. All therapeutic categories are represented on the formulary by at least one medication. When a closed formulary is in effect, only medications that are included on the formulary are a covered service. In certain clinical situations, a member may require use of a non-formulary product. Anthem has criteria that permits a member to obtain a non-formulary medication in a closed formulary plan. If specific criteria are met, a member can receive a non-formulary drug for a formulary copay. The criteria preserves the clinical integrity of the drug formulary and provides a process by which deviations from the formulary may be allowed. An appeals process is in place for any medications that do not meet the criteria.
