

**SHAWNEE STATE UNIVERSITY
BOARD OF TRUSTEES**

**Meeting Minutes
August 14, 2026**

Swearing In of Board Member

Chair Daniels administered the oath of office to newly appointed Board member, Mr. Scott Williams.

Call to Order

Chair Daniels called the meeting to order at 8:40 a.m. noting the meeting was in compliance with R.C. § 121.22(F).

Roll Call

Members present: Mr. Daniels, Dr. Adams, Mr. Furbee, Mr. Richey, Dr. Haas, Mr. Williams, and Mr. Shah. Mrs. Schisler joined the meeting at 8:55 a.m.

Members absent: Mrs. Dennis, Ms. Wilbur

Approval of the August 14, 2026 Agenda

Mr. Furbee moved and Mr. Shah seconded a motion to approve the August 14, 2026, Board meeting agenda. The motion was passed by unanimous roll call vote of all Board members present. Mrs. Schisler was not present for the vote.

President's Report

1. President Braun presented a FY26 review, reported on FY27 initiatives and construction projects, and reviewed the Fall 2026 semester enrollment forecast.
2. Mr. Craig Gilliland, Chief Financial Officer, presented the FY27 budget and financial plan, including significant factors impacting budget, cash and investment summary, fiscal year cash flow summary, Senate Bill 6 ratio summary, Moody's financial indicators, and institutional financial health.
3. President Braun and Mr. Gilliland presented the campus repurposing plan. The plan will develop a strategic roadmap to guide reorganization and optimization of the built campus that is practical and feasible for action in the next five to seven years, relative to realistically available funding.
4. Mr. Gerald Cadogan, Director of Athletics, presented the FY27 Athletics Plan including

varsity student enrollment projections, NCAA Division II membership process, compliance initiatives, sports medicine partnership, athletic facilities plan, and football program update.

5. Mr. Chris Shaffer, Chief of Executive Affairs, reported on economic development and the Department of Energy Portsmouth site plan.
6. Dr. Kimberly Inman, Provost and Vice President for Academic and Student Affairs, presented on strategic planning and Academic and Student Affairs priorities including updates on Senate Bill 1 and House Bill 96.
7. Ms. Elizabeth Blevins, Special Assistant to the President for Student Experience, reviewed the Shawnee One student experience plan including reorganization to align with the model.

Resolution F21-26, 2026-2027 Adjusted Student Tuition and Fees

Mr. Gilliland presented Resolution F21-26, 2026-2027 Adjusted Student Tuition and Fees, revising fee schedules after adoption of the increase and subsequent ODHE bond fee pledge request submission review.

Dr. Adams moved that the Board adopt Resolution F21-26 and Mr. Furbee seconded the motion. The motion was passed by unanimous roll call vote of all Board members present. Mr. Richey left the meeting at 1:50 and was not present for the vote.

Comments from Constituent Groups and the Public

Adjournment

Dr. Haas moved and Mr. Shah seconded a motion to adjourn. The motion was passed by unanimous roll call vote of all Board members present and the Board adjourned at 2:48 p.m.

Chairperson, Board of Trustees

Secretary, Board of Trustees

RESOLUTION F21-26

2026-27 ADJUSTED STUDENT TUITION AND FEES

WHEREAS, Resolution F03-26 (copy attached) adopted the tuition and student fees for AY2026-27 at the February 13, 2026 Board of Trustees meeting; and

WHEREAS, Resolution F18-26 (copy attached) altered some of the tuition and student fees for AY2026-27 due to new bond offering at the June 26, 2026 Board of Trustees meeting; and

WHEREAS, after adoption of the increase and subsequent ODHE bond fee pledge request submission review, revisions to some of the student fees, including general fees, bond fees, student parking fee description, and rounding for student billing purposes are being recommended;

THEREFORE, BE IT RESOLVED that the Board of Trustees approves the revised student fees schedules as attached.

RESOLUTION F03-26

APPROVAL OF AY2026-27 TUITION AND STUDENT FEES

WHEREAS, tuition and general fees are utilized for instructional needs, student support services and programming, and institutional operations; and

WHEREAS, Shawnee State University, like all public universities, must proceed with pricing of services in order to perform normal business operations and finalize the University's FY2027 operating budget, and the Chief Financial Officer and the President recommend approval of the tuition and fees schedules (attached) for the following categories:

- Undergraduate Tuition
 - o Shawnee Advantage (Autumn 2026 – Spring 2030)
 - o Continuing Students with Non-Guarantee Rates
- Graduate Tuition Rates
- Graduate Online Tuition Rates
- AY2026-27 Course & Program Fees
- AY2026-27 Other Student Fees
- Residential Rates and Fees:
 - o Shawnee Advantage (Autumn 2026 – Spring 2030)
 - Housing and Meal Plan Rates, Residential Connectivity Fee, Residential Student Programming Fee
 - o Autumn 2026 and Spring 2027 Continuing and Returning (Non-Guarantee)
 - Housing and Meal Plan Rates, Residential Connectivity Fee, Residential Student Programming Fee
 - o Summer 2026 Residential Housing Fees

THEREFORE, BE IT RESOLVED that the Board of Trustees approves the proposed tuition and fees schedules, contingent upon approval by the Ohio Department of Higher Education (ODHE), if required.

Secretary, SSU Board of Trustees

RESOLUTION F03-26

APPROVAL OF AY2026-27 TUITION AND STUDENT FEES

WHEREAS, tuition and general fees are utilized for instructional needs, student support services and programming, and institutional operations; and

WHEREAS, Shawnee State University, like all public universities, must proceed with pricing of services in order to perform normal business operations and finalize the University's FY2027 operating budget, the Chief Financial Officer and the President recommend approval of the tuition and fees schedules (attached) for the following categories:

- Undergraduate Tuition
 - o Shawnee Advantage (Autumn 2026 – Spring 2030)
 - o Continuing Students with Non-Guarantee Rates
- Graduate Tuition Rates
- Graduate Online Tuition Rates
- AY2026-27 Course & Program Fees
- AY2026-27 Other Student Fees
- Residential Rates and Fees:
 - o Shawnee Advantage (Autumn 2026 – Spring 2030)
 - Housing and Meal Plan Rates, Residential Connectivity Fee, Residential Student Programming Fee
 - o Autumn 2026 and Spring 2027 Continuing and Returning (Non-Guarantee)
 - Housing and Meal Plan Rates, Residential Connectivity Fee, Residential Student Programming Fee
 - o Summer 2026 Residential Housing Fees

THEREFORE, BE IT RESOLVED that the Board of Trustees approves the proposed tuition and fees schedules, contingent upon approval by the Ohio Department of Higher Education (ODHE), if required.

Summary: Analysis of HB96 Priority Areas Across the Shawnee State University General Education Program

Executive Summary

This report evaluates the Shawnee State University General Education Program (GEP) against the four HB96 priority areas: Civics, Culture, and Society; Artificial Intelligence, STEM, and Computational Thinking; Entrepreneurship and Principles of Innovation; and Workforce Readiness. Overall, the GEP demonstrates strong alignment with workforce preparation and civic education goals while revealing opportunities to strengthen entrepreneurship and AI literacy.

Methodology

The analysis is based on the HB96 course review and documented alignment of GEP courses with the four HB96 categories. Courses across humanities, social sciences, natural sciences, mathematics, economics, communication, and the arts were evaluated collectively.

Category 1: Civics, Culture, and Society

Strengths: Extensive exposure to civic literacy, history, culture, ethics, constitutional principles, global awareness, and civil discourse. Gaps: Limited direct civic-engagement experiences. Recommendations: Expand service learning, public engagement assignments, and community-based projects.

Category 2: Artificial Intelligence, STEM, and Computational Thinking

Strengths: Strong quantitative reasoning, scientific literacy, and evidence-based inquiry. Gaps: AI literacy varies by discipline and is not consistently scaffolded. Recommendations: Develop institution-wide AI literacy outcomes, increase digital fluency instruction, and incorporate data-literacy activities across the curriculum.

Category 3: Entrepreneurship and Principles of Innovation

Strengths: Creativity, innovation, problem solving, design thinking, artistic expression, and economic reasoning are present throughout the curriculum. Gaps: Entrepreneurship is often indirect and not explicitly assessed. Recommendations: Introduce innovation-focused projects, entrepreneurship modules, and interdisciplinary problem-solving experiences.

Category 4: Workforce Readiness

Strengths: Communication, critical thinking, teamwork, ethical reasoning, research, and analytical skills are highly developed. Gaps: Students are not always asked to explicitly identify and communicate transferable workforce skills. Recommendations: Create competency mapping, career-reflection activities, and workforce-readiness portfolios.

Cross-Cutting Strengths

The GEP develops communication, critical thinking, ethical reasoning, cultural competence, quantitative reasoning, information literacy, and civic understanding. These skills are repeatedly reinforced across multiple disciplines.

Cross-Cutting Gaps

Career articulation, leadership practice, entrepreneurship, digital literacy, and AI competency are not uniformly represented across all GEP categories.

Strategic Recommendations

1. Create a GEP-to-HB96 mapping framework. 2. Integrate workforce competency reflections. 3. Expand applied civic and community-engaged learning. 4. Build AI literacy modules for all students. 5. Create innovation and entrepreneurship experiences across disciplines. 6. Implement ePortfolios documenting workforce skill growth.

Implementation Roadmap

Short-term: competency mapping, AI literacy standards, career reflections. Medium-term: ePortfolio system, civic engagement expansion, interdisciplinary innovation projects. Long-term: systematic assessment of HB96 outcomes and employer-informed revisions to the GEP.

Conclusion

The SSU GEP strongly supports HB96 goals, particularly in Civic Literacy and Workforce Readiness. With targeted improvements in AI literacy, entrepreneurship, leadership practice, and career-development activities, the program can become a model for integrating liberal education and workforce preparation.

Analysis of Computational Thinking Across the Shawnee State University General Education Program

Executive Summary

Based on the HB96 General Education Program review and the provided characteristics of computational thinking, Shawnee State University's General Education Program (GEP) demonstrates **moderate to strong exposure to computational thinking**, although this exposure is unevenly distributed across disciplines. Computational thinking is most explicitly developed in mathematics, statistics, natural sciences, economics, logic, geography, political science, anthropology, psychology, and certain history courses. However, many humanities and arts courses also cultivate important computational-thinking habits such as pattern recognition, abstraction, and analytical reasoning, even when they are not labeled as such.

Using the standard computational thinking framework, the analysis below evaluates the GEP according to:

- **Decomposition**
 - **Pattern Recognition**
 - **Abstraction / Generalization**
 - **Algorithmic Thinking**
 - **Analysis and Evaluation**
-

Computational Thinking Framework

The characteristics document describes computational thinking as involving:

1. **Decomposition:** breaking complex problems into smaller components.
 2. **Pattern Recognition:** identifying similarities, trends, or recurring structures.
 3. **Abstraction/Generalization:** focusing on essential features and creating transferable explanations.
 4. **Algorithmic Thinking:** developing systematic procedures for solving problems.
 5. **Analysis and Evaluation:** assessing outcomes and refining solutions.
-

Courses with Strong Direct Computational Thinking Alignment

Mathematics Courses

The HB96 review explicitly identifies mathematics courses as developing:

- computational thinking,
- quantitative reasoning,
- analytical problem solving,
- systematic approaches to solving problems.

Computational Thinking Elements

CT Component	Presence
Decomposition	Strong
Pattern Recognition	Strong
Abstraction	Strong
Algorithms	Strong
Analysis	Strong

Overall: Excellent alignment.

Statistics Courses

Statistics is perhaps the most direct computational-thinking discipline outside computer science.

Students learn:

- data interpretation,
- statistical reasoning,
- model building,
- evidence-based conclusions.

Computational Thinking Elements

CT Component	Presence
Decomposition	Strong
Pattern Recognition	Strong
Abstraction	Strong
Algorithms	Moderate-Strong
Analysis	Strong

Overall: Excellent alignment.

Natural Science and Laboratory Science Courses

Science courses require students to:

- formulate hypotheses,
- analyze evidence,
- identify relationships,
- evaluate outcomes,
- perform systematic inquiry.

Laboratory courses add:

- experimental design,
- troubleshooting,
- iterative problem solving.

Overall: Strong computational thinking development.

PHIL 1105 Introduction to Logic

Logic may be the strongest non-STEM computational thinking course.

Students learn:

- symbolic systems,
- truth tables,
- formal reasoning,
- proof construction,
- systematic evaluation of arguments.

Computational Thinking Elements

CT Component	Presence
Decomposition	Strong
Pattern Recognition	Strong
Abstraction	Strong
Algorithms	Strong
Analysis	Strong

Overall: Exceptional alignment.

Economics (ECON 1104, 2201, 2202)

Economics extensively develops computational thinking through:

- models,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- systems analysis,
- cost-benefit analysis,
- forecasting,
- resource allocation,
- evidence evaluation.

Students routinely learn to:

- identify variables,
- recognize patterns,
- construct models,
- evaluate outcomes.

Overall: Strong alignment.

Courses with Moderate Computational Thinking Alignment

Geography

World Geography requires:

- map interpretation,
- spatial analysis,
- data analysis,
- recognition of geographic patterns,
- evaluation of relationships among environmental and social variables.

The discipline naturally emphasizes:

- pattern recognition,
- abstraction,
- systems thinking.

Overall: Moderate to strong alignment.

History Courses

History courses frequently require:

- evaluating evidence,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- identifying patterns across time,
- understanding cause-and-effect relationships,
- synthesizing information into explanatory frameworks.

Examples include:

- HIST 1331
- HIST 1340
- HIST 2430
- HIST 2440

While they generally lack explicit algorithmic thinking, they strongly support:

- decomposition,
- pattern recognition,
- abstraction.

Overall: Moderate alignment.

Political Science Courses

Students analyze:

- institutions,
- political systems,
- comparative cases,
- causal relationships,
- policy outcomes

Comparative Politics and International Relations are particularly strong because they require systematic comparison of variables across nations and institutions.

Overall: Moderate alignment.

Psychology, Sociology, and Anthropology

These disciplines expose students to:

- research methods,
- qualitative and quantitative analysis,
- behavioral explanation,
- evidence evaluation,
- data interpretation.

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

Students learn many computational-thinking processes even though they are not described using that language.

Overall: Moderate alignment.

Courses with Indirect Computational Thinking Alignment

Humanities and arts courses frequently support:

- abstraction,
- pattern recognition,
- interpretation of complex systems.

Examples include:

- Literature
- Philosophy
- Art History
- Theatre Appreciation
- Cultural History courses

Students identify:

- recurring themes,
- social patterns,
- symbolic systems,
- cultural structures.

These experiences contribute meaningfully to computational thinking, particularly around abstraction and pattern recognition.

Overall: Indirect but meaningful alignment.

Program Strengths

1. Strong Analytical Foundation

The GEP already develops:

- logic,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- scientific reasoning,
- quantitative analysis,
- systems thinking,
- evidence-based decision making.

These are core computational-thinking skills.

2. Computational Thinking Across Multiple Disciplines

Computational thinking is not confined to STEM.

Students encounter:

- pattern recognition in history,
- systems analysis in economics,
- abstraction in philosophy,
- data interpretation in geography,
- evidence evaluation in psychology.

This interdisciplinary exposure is a significant strength.

3. Strong Critical Thinking Integration

The HB96 review consistently shows that the GEP emphasizes:

- evidence,
- reasoning,
- analysis,
- interpretation,
- problem solving.

These overlap significantly with computational-thinking competencies.

Gaps

1. Computational Thinking Is Rarely Explicit

Students engage in computational thinking frequently, but courses rarely identify it as:

- a learning outcome,
- a transferable skill,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- a workforce competency.
-

2. Limited Algorithmic Thinking Outside STEM

While decomposition and pattern recognition are widespread, explicit algorithm design appears primarily in:

- mathematics,
 - logic,
 - statistics,
 - scientific methods.
-

3. Uneven AI Literacy

The HB96 review notes expanding AI instruction in some areas, particularly composition courses, but AI literacy is not yet systematically integrated across the curriculum.

4. Lack of Computational Thinking Assessment

Few courses directly measure:

- decomposition,
- pattern recognition,
- abstraction,
- algorithmic reasoning

as explicit outcomes.

Recommendations

Recommendation 1: Establish Computational Thinking as a Cross-Curricular Outcome

Create a GEP-wide definition of computational thinking using:

- decomposition,
- pattern recognition,
- abstraction,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- algorithmic thinking,
 - analysis.
-

Recommendation 2: Map Existing Courses to Computational Thinking

Many courses already support computational thinking.

Develop a formal crosswalk identifying:

- direct CT courses,
 - indirect CT courses,
 - assessment opportunities.
-

Recommendation 3: Expand AI and Data Literacy

Include modules addressing:

- AI evaluation,
- algorithmic bias,
- data literacy,
- technology ethics

throughout the GEP.

Recommendation 4: Develop Signature Assignments

Require students to:

- break down complex problems,
- identify patterns,
- construct explanatory models,
- evaluate solutions

using computational-thinking frameworks in multiple disciplines.

Recommendation 5: Integrate Computational Thinking into Humanities and Social Sciences

Students already perform many computational-thinking tasks in:

- history,

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

- geography,
- sociology,
- political science,
- literature.

Making these connections explicit would strengthen workforce readiness and artificial intelligence literacy simultaneously.

Overall Conclusion

The Shawnee State University GEP already provides substantial exposure to computational thinking, particularly through mathematics, statistics, natural sciences, economics, logic, geography, political science, psychology, sociology, anthropology, and history. The strongest computational-thinking characteristics currently emphasized are:

1. **Analysis and Evaluation**
2. **Pattern Recognition**
3. **Abstraction**
4. **Decomposition**

The least-developed characteristic is:

1. **Algorithmic Thinking**

The greatest opportunity is not necessarily adding more computational-thinking experiences, but rather making existing computational-thinking activities **explicit, assessable, and connected to workforce readiness and AI literacy goals.**

Analysis of Shawnee State University General Education Program Alignment with NACE Career Readiness Competencies

Overall Assessment

Communication and Critical Thinking show very strong alignment. Teamwork is moderate-strong. Technology, Professionalism, and Leadership are moderate. Career & Self-Development is the primary area for growth.

Areas of Strength

Communication is embedded across composition, communication, humanities, and social science courses. Critical thinking is reinforced through philosophy, history, mathematics, sciences, and economics. Teamwork is developed through peer review, group projects, presentations, and discussions.

Moderate Areas

Technology literacy is present but unevenly distributed. Professionalism is taught indirectly through research integrity, deadlines, and formal communication. Leadership is discussed frequently but less often practiced.

Career & Self-Development

The GEP develops many transferable skills but students are rarely asked to explicitly connect those skills to career planning, professional identity, networking, or lifelong learning.

Recommendations

Create a GEP-to-NACE crosswalk; add career reflections in GEP courses; expand leadership opportunities; strengthen technology and AI literacy; and develop a career readiness portfolio tied to NACE competencies.

Conclusion

The GEP already provides a strong foundation for workforce readiness through communication, critical thinking, research, and cultural awareness. The greatest opportunity is making career development and professional skill articulation more intentional across the curriculum.

Program-Level Observations

Strongest HB96 Areas

1. **Workforce Readiness (4)** appears throughout nearly every GEP category.
2. **Civics, Culture, & Society (1)** is strongly represented across humanities, history, social sciences, communication, and political science.

Strongest NACE Competencies

1. **Communication**
2. **Critical Thinking**

These appear in nearly every humanities, social science, and communication course.

Moderate Competencies

- Teamwork
- Leadership
- Technology
- Professionalism

Present but unevenly distributed across disciplines.

Largest Gap

Career & Self-Development

Certified as True and Correct
August 17, 2026

Secretary, SSU Board of Trustees

Students clearly develop workforce skills, but few courses explicitly ask students to:

- articulate career goals,
 - identify transferable skills,
 - reflect on professional development,
 - build career portfolios.
-
