

## How We Stand Out:

- SSU's Pre-Med Club invites speakers from medical schools, organizes social activities, and helps students with the medical school application process.
- The SSU Tri-Beta Club is the Xi Upsilon chapter of the  $\beta\beta\beta$  National Biological Honor Society. They promote research and research activities within the department.

## College of Arts & Sciences

The College of Arts & Sciences at Shawnee State University includes the Vern Riffe Center for the Arts, five academic departments, 34 baccalaureate degree programs, 30 minors, and five associate degree programs. The College also includes a Master of Mathematical Sciences degree.

*We invite you to explore opportunities available through our diverse areas of study.*

## Biomedical Sciences at SSU

Our Biomedical Sciences program includes all required classes for medical school entry—and offers a unique set of advanced biology courses that you are unlikely to find at any other undergraduate institution — including an advanced human anatomy course that involves actual human cadaver dissection.

Shawnee State faculty members offer research opportunities for every student enrolled in our program, and work one-on-one with you in several dedicated research lab spaces. We also have an ongoing research collaboration with the Southern Ohio Medical Center that enhances the education that you receive.

## How We Stand Out:

- Personalized attention from experienced faculty members in the department; seven of whom hold Ph.D's in Biology, one with an M.S. in Biology.
- Undergraduate research opportunities every semester.
- Upper-division classes are small, with class sizes typically around 15 – 20 students.
- A teaching licensure option is available with our BS Natural Sciences degree.
- High admittance rate to graduate, medical, and pharmacy schools as an SSU graduate.
- Active biology clubs within the department that invite speakers to campus, get involved with the community, and organize social activities.
