National Accreditation

Shawnee State University is fully accredited by the National Council for Accreditation of Teacher Education (NCATE) which transitioned to the Council for the Accreditation of Educator Preparation (CAEP) effective July 1, 2013. For additional information on the quality standards to which Shawnee State University's educator preparation programs adhere, see the CAEP Unit Standards. Shawnee State's next accreditation visit by CAEP is in the fall of 2021.

- Notice from CAEP

Teacher Effectiveness after Graduation

Completers' Impact on P-12 Student Learning and Development

Value-Added: Ohio's value-added data system provides information on student academic gains. The value-added data included are those reported by Ohio's Education Value-Added Assessment System (EVAAS) based on Elementary and Middle School Tests (Grades 4-8) and End-of-Course tests for high school credit. Value-added classifications are calculated for teachers of math and reading based on the value added to the students they taught. On average, approximately 40% (37.5% for SSU in 2017-18) of the employed teachers who earn licenses in the three preceding years receive value-added classifications.

Ohio Teacher Evaluation System (OTES) Results

OTES Classifications: Ohio's system for evaluating teachers (Ohio's Teacher Evaluation System) provides educators with a detailed view of their performance, with a focus on specific strengths and opportunities for improvement. Each teacher is evaluated using the evaluation framework which is aligned to the Ohio Standards for the Teaching Profession. Teachers receive an evaluation classification based on their performance.
### Analysis of Results

In 2016-2017, 16 teachers prepared at Shawnee State University were rated as “skilled” in their first year of teaching. The effectiveness ratings of teachers prepared by Shawnee State are not reported in the other cells due to the low numbers of completers.

### Comparisons with Benchmarks and Trends

It is difficult to compare the data of completers with OTES data because of the low numbers of completers from SSU. As the numbers of graduates increase, these comparisons will be more meaningful.

### Employer Satisfaction and Completer Persistence in Profession

#### Employer Satisfaction

To gather information on the quality of preparation provided by their educator preparation providers, the Ohio Department of Higher Education distributes a survey annually to employers of Ohio educators. Questions on the 15-item survey are aligned with Ohio's Learning Standards, Ohio licensure requirements, and elements of national accreditation.

### Analysis of Results

In 2016 employers indicated a high level of satisfaction with the quality of the preparation provided by Shawnee State University. All but four items on the survey earned a rating of 3.00 or higher (on an agreement scale of 1 to 4). The survey

### Comparisons with Benchmarks and Trends

When compared to the state results, employers rated the quality of preparation provided by Shawnee State University similarly. Two of the lowest rated items on the survey for Shawnee State were also the lowest rated items for the state: #7
Analysis of Results

results suggest that employers perceive that Shawnee State University prepares teachers especially well to treat students fairly and establish a learning environment that is respectful, supportive, and caring.

In the years since 2016, the number of employers who completed the survey were smaller. Shawnee PLANS to encourage employers to complete the survey and to send reminders to them at the time the survey is “live.”

Comparisons with Benchmarks and Trends

preparing graduates to use data to plan, differentiate, and modify instruction (SSU 2.75 compared to state 2.97) and #6 preparing graduates to analyze data to monitor student progress and learning (SSU 2.83 compared to state 2.99). The higher rated items were also similar for Shawnee State and the state: #3 preparing graduates to know and understand the content area for which they have instructional responsibility (SSU 3.25 compared to state 3.35); #1 preparing graduates to understand student learning and development (SSU 3.25 compared to state 3.30).

- 2015-2016

Completer Persistence in Profession

Shawnee State University tracks the degree to which program completers remain in the teaching profession. This is measured through the records provided by the state for Shawnee State University-prepared teachers who enter and persist in the Ohio Resident Educator four-year teacher development system.
Analysis of Results

The persistence rate of teachers prepared by Shawnee State University is high. In 2016-2017, 100% of Shawnee State University-prepared teachers completed their first year of the Resident Educator Program, 97.7% completed year two, 100% completed year three, and 100% completed year four.

Comparisons with Benchmarks and Trends

The persistence rate of teachers prepared by Shawnee State University is higher than the state average. For example, in 2016-2017, 99.43% of SSU-prepared teachers completed year one of the Resident Educator program compared to 98.8% across the state.

Completer Satisfaction

To gather information on alumni satisfaction with the quality of preparation provided by their educator preparation programs, the Ohio Department of Higher Education administers a survey aligned with the Ohio Standards for the Teaching Profession (OSTP), Ohio licensure requirements, and elements of national accreditation. All Ohio Resident Educators who completed their preparation in Ohio receive an invitation to complete the survey in the fall semester as they enter Year 2 of the Resident Educator program.

Analysis of Results

Shawnee State University-prepared teachers generally indicated a high level of satisfaction with the quality of the preparation they received. No item on the survey received a mean below 3.0 (on an agreement scale of 1 to 4), and 94% of the items on the survey earned a rating of 3.20 or higher. The highest rating

Comparisons with Benchmarks and Trends

The lowest rated item on the survey for both Shawnee State University and the state was #29 knowledge of the state’s Value-Added Growth Measure; however, SSU-prepared teachers rated the preparation they received much higher than the state average on this item (SSU 3.00 compared to 2.69 state average). SSU-

Employment

Employment in Ohio Public School Districts

The Ohio Department of Higher Education provides universities with employment data annually. The data include Shawnee State University program completers who were employed in an Ohio public school during the academic year and earned licenses in the three preceding years. The employment data do not include program completers who were employed in private schools or who were employed outside the state of Ohio.

</thead>
<tbody>
<tr>
<td>During the years 2013-2018, approximately 94% of Shawnee State School of Education (SoE) graduates were employed in Ohio public schools one year after graduation. Across all programs, 94% of Shawnee graduates (teaching in Ohio) persist in the field through the first 2 years. Of those who received licenses in 2013, 47% were still teaching after 3 years, and 40% remained after 4 consecutive years. Of those receiving license in 2014, 11 of 43 (26%) were still teaching after 3 years.</td>
<td>Of the 2014 graduates, only 4 of 43 taught for 1 year. The remaining 39 persisted at least one additional year. Of the grads who received licenses in 2015, 47% were still teaching after three years while 37 of 49 (76%) are still teaching after 3 years. Of the graduates in 2016, 31% are still teaching after 2 years. 36 graduates obtained licenses and began to teach in 2017, 29 (81%) are still teaching in 2018.</td>
</tr>
</tbody>
</table>
### Analysis of Results

Across all initial licensure programs, the number of Shawnee State University graduates employed in Ohio schools has been increasing. 145 School of Education graduates received teaching licenses in 2018. 107 are teaching in 2018.

### Comparisons with Benchmarks and Trends

A review of the employment data by licensure area reveals that Shawnee State University program completers with licenses in intervention specialist-moderate/intensive needs, integrated had the highest rates of employment after three years (100%).

### Employment in High-Needs Schools

As an additional measure, Shawnee State University tracks the percentage of its graduates who address employer needs by working in high-needs schools in Ohio. Data is obtained from the Ohio Department of Higher Education and includes only those teachers who have value-added data and work in schools with high-poverty or medium-high poverty.
Analysis of Results

In 2016-2017, approximately one half of Shawnee State University-prepared teachers were employed in high-needs schools.

Comparisons with Benchmarks and Trends

When compared to the state average, a lower percentage of Shawnee State University-prepared teachers were employed in high-needs schools in 2016-2017 (49% SSU-prepared teachers compared to 54% across the state).

Consumer Information

Student Loan Cohort Default Rate

A cohort default rate is the percentage of a school's borrowers who enter repayment on certain Federal Family Education Loan (FFEL) Program or William D. Ford Federal Direct Loan (Direct Loan) Program during a particular federal fiscal year (FY). The U.S. Department of Education releases official cohort default rates once per year.
## Analysis of Results

The student default rate for FY 2015 for Shawnee State University was 17.5%.

## Comparisons with Benchmarks and Trends

Students who attended Shawnee State University were more likely to default on their student loan payments than students who attended other universities. The student loan default rate for Shawnee State University (17.5%) was higher than the Ohio average of 12.2% and the federal average of 10.8%.
