## National Accreditation

Shawnee State University is fully accredited by the National Council for Accreditation of Teacher Education (NCATE), which transitioned to the Council for the Accreditation of Educator Preparation (CAEP) effective July 1, 2013. For additional information on the quality standards to which Shawnee State University's educator preparation programs adhere, see the [CAEP Unit Standards](#). Shawnee State's next accreditation visit by CAEP is in the fall of 2021.

## Teacher Effectiveness after Graduation

### Completers' Impact on P-12 Student Learning and Development

**Value-Added:** Ohio's value-added data system provides information on student academic gains. The value-added data included are those reported by Ohio's Education Value-Added Assessment System (EVAAS) based on Elementary and Middle School Tests (Grades 4-8) and End-of-Course tests for high school credit. Value-added classifications are calculated for teachers of math and reading. On average,

approximately 40% (37.5% for SSU in 2017-18) of the employed teachers who earn licenses in the three preceding years receive value-added classifications.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>The value-added data in this report are those reported by Ohio's Education Value Added Assessment System (EVAAS) based on Elementary and Middle School Tests (Grades 4-8) and End-of-Course tests for high school credit. Shawnee State-prepared teachers are effective with regard to student learning and development. In the reporting year 2018-19, for the graduates with the initial licensure dates effective for the academic years 2015-2018, 39% of Shawnee State University-prepared teachers earned value-added classifications for the three highest levels:</p>	<p>Most effective (9%), above average (7%), or average (23%). In two of the last four years, 117 SSU graduates have been employed as teachers in Ohio. Of those, 44 have Value-Added data. Due to the grades, subjects and selection process, these data are not representative of the entire population of SSU graduates who are in their entry years. In 2018-2019, the percentage of teachers earning the three highest value-added classifications for Shawnee State was 39% compared to 57% across the state.</p>
<p>A review of the value-added data by licensure area reveals great variation in the number of teachers with value-added data.</p>	<p>Due to the small numbers of SSU graduates, comparisons by licensure area are of limited value.</p>

## Ohio Teacher Evaluation System (OTES) Results

**OTES Classifications:** Ohio's system for evaluating teachers, Ohio's Teacher Evaluation System (OTES), provides educators with a detailed view of their performance, with a focus on specific strengths and opportunities for improvement. Each teacher is evaluated using the OTES evaluation framework that is aligned to the Ohio Standards for the Teaching Profession. Teachers receive an evaluation classification based on their performance.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>In 2017-18, 11 teachers prepared at Shawnee State University were rated as “Accomplished” and 12 were rated as “Skilled” in their first year of teaching. The effectiveness ratings of teachers prepared by Shawnee State are not reported in the other cells due to the low numbers of completers.</p>	<p>It is difficult to compare the data of completers with OTES data because of the low numbers of completers from SSU. As the numbers of graduates increase, these comparisons will be more meaningful. However, these data denote improvement in ratings as in 2017 the number of “Accomplished” was less than 10.</p>

## Employer Satisfaction and Completer Persistence in Profession

### Employer Satisfaction

To gather information on the quality of preparation provided by their educator preparation providers, the Ohio Department of Higher Education distributes a survey annually to employers of Ohio educators. Questions from the 15-item survey were aligned with Ohio's Learning Standards, Ohio licensure requirements, and elements of national accreditation.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>In academic year 2018-19, the State of Ohio discontinued the employer's survey. While employers in previous years indicated a high level of satisfaction with the quality of the preparation provided by Shawnee State University, return was low with reliability untenable.</p> <p>Shawnee State began sending the Employers Survey to its partner school cooperating teachers in 2019. With the Covid19 pandemic, we expected our return rate on this survey to be very low. However, after only one mailing of the survey, we received 40 of 40 responses, for a return rate of 100%. (We recognize how unusual it is to have such a high response rate; we attribute it to the need of the teachers to be doing something related to work while off for Covid19!)</p> <p>The data from the Employers' Survey (administered to Cooperating Teachers) revealed that the cooperating teachers were very favorable toward our candidates. The teachers rated the SSU graduates which whom they had worked as competent and ready to teach. The lowest rating with 5 of 40 (12.5%) cooperating teachers rating our students as being unprepared was planning and differentiating instruction.</p> <p>Four of forty teachers (10%) rated their graduates as not prepared to differentiate instruction or support the learning of all students.</p> <p>3 of 39 also felt our graduates were not prepared in areas related to assessment and use of assessment data. We will address this weakness in our curriculum in the coming semesters.</p>	<p>On the remaining 9 items, 38 or more cooperating teachers (out of 40, 95%) rated our grads as prepared to work with their students in content; content-specific strategies; alignment of curricula to standards; treating students fairly and establishing an environment that is respectful, supportive and caring; maintaining and environment conducive to learning for all students; able to communicate clearly and effectively; able to collaborate with teachers administrators and staff; demonstrate professional and ethical behavior; and able to assume responsibility for professional growth.</p> <p>One teacher had an extremely unfavorable opinion of SSU we learned later from her student teacher. The student teacher told us of the unprofessional and disparaging remarks made regularly by this teacher. We believe this one teacher may have skewed the data by giving the lowest possible rating on every item.</p> <p>In conversations with our principals, superintendents and cooperating teachers, the anecdotal evidence reveals a high degree of satisfaction with Shawnee's teachers. In fact, Portsmouth City Schools wishes to interview new teachers before our virtual Career Fair this May. The superintendent asked for his own interview date, as he would like to hire SSU graduates for each of his open positions. Likewise, another superintendent (New Boston,</p>

Analysis of Results	Comparisons with Benchmarks and Trends
Similarly, 3/39 teachers rated our graduates as prepared to respect the diversity of the students they teach. We plan to look into these ratings as we hope never to put a student into the field is not prepared to respect diversity, differentiate instruction or support the learning of all students.	OH) is so pleased with SSU teachers that she, too, will try to hire an SSUE graduate for each of her open positions.

### Completer Persistence in Profession

Shawnee State University tracks the degree to which program completers remain in the teaching profession. This is measured through the records provided by the state for Shawnee State University-prepared teachers who enter and persist in the Ohio Resident Educator four-year teacher development system.

Analysis of Results	Comparisons with Benchmarks and Trends
The Resident Educator Program in Ohio encompasses a robust four-year teacher development system. The data demonstrate the	In 2018-2019, 96.3% of Shawnee State University-prepared teachers completed their first year of the Resident Educator

Analysis of Results	Comparisons with Benchmarks and Trends
<p>persistence of graduates through the program. The following data represent the persistence rate of teachers prepared by Shawnee State University. Overall, our graduates persist to completion of the Resident Educator Program at a rate commensurate with the state average.</p>	<p>Program, while 98.1% of State teachers completed year one of RESA. While more than 100% of teachers in Ohio completed RESA years 1-3, and 99.3% completed year 4, 100% Shawnee graduates completed years 2 through 4.</p>

## Completer Satisfaction

To gather information on alumni satisfaction with the quality of preparation provided by their educator preparation programs, the Ohio Department of Higher Education administers a survey aligned with the Ohio Standards for the Teaching Profession (OSTP), Ohio licensure requirements, and elements of national accreditation. All Ohio Resident Educators who completed their preparation in Ohio receive an invitation to complete the survey in the fall semester as they enter Year 2 of the Resident Educator program.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>Generally, Shawnee State University-prepared teachers have indicated a high level of satisfaction with the quality of their teacher preparation. The results of the 2018, survey however,</p>	<p>Due to the low return rate on this survey, beginning in 2019, the SSU School of Education completed focus group interviews with our graduates, however, these data have not been reported as</p>

Analysis of Results	Comparisons with Benchmarks and Trends
we below the threshold for reporting (fewer than 10 surveys returned).	Covid19 interfered with their completion. We intend to complete and report the data in a few months.

## Graduation Rates

### Graduation Rate after 6 Years - Initial Programs

Shawnee State University tracks the number and percentage of students who earn a bachelor's degree after six years.

Analysis of Results	Comparisons with Benchmarks and Trends
On average, nearly 100% of undergraduate students who entered the Teacher Education Program at SSU graduate in 4 or 5 years. Undergraduate students who entered the university as a	There are a number of students at SSU who transfer into the School of Education after taking courses from another college or university. These students are more likely to graduate in less than 4 years. Ten of 32 or 31% of 2019 completers graduated in

major in the College of Professional Studies were more likely to graduate than Shawnee State University students as a whole.	3 years; 17 more from the same cohort graduated in 4 years (84%) and 5 more completed in 5 years for 100% of the 2019 cohort.

n=32	5 years	4 years	3 years
Number of Students	5	17	10
Percentage Rate	100%	84%	31%

## Ohio Assessments for Educators (OAE) Licensure Test Pass Rates

### OAE Pass Rates - Initial Licensure Programs

As part of the process of becoming a licensed educator in particular areas in Ohio's pre-kindergarten through grade 12 system, candidates must pass licensure exams. The tests for initial licensure are the Ohio Assessment for Educators.

Analysis of Results	Comparisons with Benchmarks and Trends
The results indicate that Shawnee State University program completers are successful in passing the state-required licensure examinations. Over the past three years, 97% of Shawnee State University program completers pass the state's licensure examinations. The pass rate for 2019 was 86%.	Shawnee State University program completers perform better than the state as a whole on the required licensure examinations. The average pass rate for Shawnee State University in 2014-2015 and 2015-2016 was 2.5 percentage points higher than the average pass rate for the state as a whole for that same period.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>The results indicate that Shawnee State University program completers perform exceptionally well on the state-required Assessment of Professional Knowledge exams (APK), with 100% pass rate on three of the four exams.</p>	<p>The pass rates for Early Childhood Education and all of the Middle Childhood and Adolescence to Young Adult content areas was 100%. The lowest pass rate of 83% was for Special Education.</p>

## Employment

### Employment in Ohio Public School Districts

The Ohio Department of Higher Education provides universities with employment data annually. The data include Shawnee State University program completers who were employed in an Ohio public school during the academic year and earned licenses in the three preceding years. The employment data do not include program completers who were employed in private schools or who were employed outside the state of Ohio.

Analysis of Results	Comparisons with Benchmarks and Trends
Across all initial licensure programs, approximately 100% of Shawnee State University 2013-2014 graduates were employed in Ohio schools one year after graduation.	An anecdotal review of the employment data by licensure area reveals that Shawnee State University program completers have all been hired to work in Ohio Schools (100%).

(At this time, we do not have benchmarks from other Universities with which to compare these data, but we plan to obtain the data prior to our next Annual Report. Although many students come to SSU from Kentucky and West Virginia, most (90%) obtain Ohio licensure. We will obtain the percentage of students from similar universities who achieve licensure following graduation (within two years) prior to our next CAEP Annual Report.</p>

In 2017-2018 sixty students graduated from SSU's undergraduate teacher education programs. 9 graduated from SSU's graduate programs. In 2016-2017, 44 students graduated from SSU's undergraduate teacher education programs and 8 graduate students completed the program. Of these graduates, 106 obtained Ohio teaching positions (88%) in 2018.

## Consumer Information

### Student Loan Cohort Default Rate

A cohort default rate is the percentage of a school's borrowers who enter repayment on certain Federal Family Education Loan (FFEL) Program or William D. Ford Federal Direct Loan (Direct Loan) Program during a particular federal fiscal year (FY). The U.S. Department of Education releases official cohort default rates once per year.

Analysis of Results	Comparisons with Benchmarks and Trends
<p>The student default rate for FY 2015 for Shawnee State University was 17.5%.</p>	<p>Students who attended Shawnee State University were more likely to default on their student loan payments than students who attended other</p>

Analysis of Results	Comparisons with Benchmarks and Trends
	universities. The student loan default rate for Shawnee State University (17.5%) was higher than the Ohio average of 12.2% and the federal average of 10.8%.

### **Cost of Attendance**

Shawnee State University is pleased to provide student aid calculators to assist in early financial planning for college. [The Net Price Calculator](#) can provide students and families with an idea of the estimated expenses that could be incurred at Shawnee State University (minus any financial aid awards) based on costs established for the selected academic term. Shawnee State University also provides the Shawnee State Advantage; it promises that the Shawnee cost, tuition and fees, room and board, will not increase for four years.

### **Ohio Department of Higher Education Educator Preparation Performance Report**

To continuously improve the quality of educator preparation programs in Ohio, Ohio Revised Code 3333.048 requires the Chancellor of Higher Education and the Superintendent of Public Instruction to establish and publish metrics for institutions of higher education that prepare educators and other school personnel. Reports are available for all institutions and initial licensure programs in the state.
