

GENERAL RECORDS RETENTION SCHEDULE

Updated June 2022

INTRODUCTION

In accordance with <u>Shawnee State University's Policy 5.34</u> and <u>Ohio Revised Code 149.33(B)</u>, the University shall have a records system that covers all University departments and offices to ensure that all official records of the University, both public and exempt, are maintained and disposed in accordance with the University's records retention schedule.

A **records retention schedule** is a legally mandated tool that classifies records created, sent or received by the university, and provides instruction for records retention and disposition. Records are grouped by **record series**: related records that contain the same types of information and are filed and/or used together as a unit. Retention schedules cover records on any media format, including paper and electronic.

Shawnee State's *General Records Retention Schedule (General Schedule)* guides the management and disposition of university record series that are common to multiple units across campus. All SSU Departments should be familiar with the *General Schedule* and how the unit's records align to it.

DISPOSITION

Effective records management includes the timely disposition and documentation of obsolete records. There are currently four (4) general disposition options:

- Destroy Secured: Record series which contain "Private" or "Restricted" information, must be destroyed in a secure manner such as incineration, maceration, shredding (most common method), pulping, or secure electronic destruction. Secure destruction is recommended but not required for information identified as "Internal".
- **Destroy:** Record series which contain no restricted information may be put in the trash, recycled, or fully deleted. The secure destruction methods above may also be used.
- **Permanent within Department or Unit:** Records series with a *demonstrated legal or administrative* need to a particular unit will be maintained permanently within the unit.
- Archival Review: Record series with selective content that may be of value to University Archives in documenting Shawnee State's history, and should be submitted to the Library for review. (Records sent to be reviewed for Archival should not be included on a Records Disposition Approval Form. The transfer will be noted on Archives documentation.)

Before actually disposing of the records (including deletion of electronic records or authorizing offsite storage vendors), the SSU Department Records Custodian should complete a <u>Records Disposition Approval Form</u> to University Records Management for review and approval. Units are strongly encouraged to conduct records purges on a routine basis, at a minimum of annually.

Disposition Forms are not required if:

- The retention period is listed as *transient*
- The records are saved to a different format (such as paper to electronic) as part of a unit's routine workflow

Note: Any records under a preservation notice, litigation hold, reasonably anticipated litigation, or in open public records requests should not be destroyed until the issue is resolved.

RETENTION TERMINOLOGY

Record retention is either a set period of time or event-driven. Below is retention period terminology and abbreviations commonly used in Ohio State University retention schedules:

| Abbreviation | Definition |
|----------------------------|--|
| 3 CYCLES | This retention period pertains to the retention of electronic back-up files. |
| 3Y, 4Y, etc. | 3 years, 4 years |
| ACT, ACT+1, ACT+2, etc. | Active+: The final disposition clock starts once the active period is over. Example: Strategic Plans must be retained 1 year after a new strategic plan is adopted. |
| CR+1, CR+2, etc. | Creation date + 1 year, Creation date + 2 years, Creation date + 0 years/2 months |
| CY, CY+1, CY+2, etc. | Current Year (through December 31 of the year the record is created), Current Year + 1 year, Current Year + 2 years |
| FY | Fiscal Year (July 1-June 30) |
| IND or INDEFINITE | Records required to be maintained for a significant period of time and possibly permanently. Their status should be reappraised periodically. |
| LOB | Life of Building+: Similar to "Active+" but pertains specifically to buildings. The retention period begins when a building is destroyed or sold. |
| PRM | Permanent |
| SUP | Until Superseded: Documents that are routinely updated and superseded by the current version. |
| TRANSIENT | Documents including telephone messages, some emails, drafts, etc., which have temporary value. Retention is not a fixed period of time and is event-driven; should be disposed of after it is superseded by the official record or no longer needed. |

ELECTRONIC MESSAGES AS RECORDS

Electronic messages, *such as email, texts and instant messages*, are a convenient way that we convey information, similar to sending paper mail through the postal service. If an electronic message documents university business, it must be managed as a university record. The retention period for each message is based upon the content and informational value of the electronic message, not technology through which it is transmitted or stored. Review and evaluate messages based on the record series described in the SSU General Schedule retention schedules.

Keep in mind that electronic messages are comprised not just of the textual message and attachments, but also metadata (to, from, subject, time, date, system, etc.) about the message and its transmission.

MANAGING ELECTRONIC MESSAGES: The key to effectively managing electronic messages is to be proactive. Delete the non-records and any transient/transitory records that have outlived their administrative value so that what remains is the small percentage of records, sent and/or received, that retention schedules require to be managed on an on-going basis. The management of electronic messages should be approached in a manner similar to how "snail mail" is processed at work and home:

- Open the email, text, or electronic message and review the document's content:
 - If it is a non-record, delete the message outright, just as one would dump the "snail mail" non-record into the trash can or recycle bin;
 - If it is a transient/transitory record, place it in a folder or sub-folder (analog or digital) that is designated for periodic review and dispose of as soon as allowable. One might create a "Transient/Transitory" folder or create sub-folders of record type/series or projects for the transient/transitory messages.
 - If it is a record, place it in an appropriate folder by record type/series, project, retention time, or other filing schema that allows that unit to effectively manage the life cycle of the record.
